Message from the Chair

Hello STEMulators,

We are seeing an incredible groundswell of engagement from all corners of Central Florida; from parents to industry to education, we are witnessing the embracement of STEM and all the opportunities it represents for a better tomorrow. Our Educators Advisory Committee has been involved with several STEM Days, Council members such as Universal Studios, Wet n Wild & LEGOLAND continue to develop new STEM student activities and DISTI Corporation continues its funding of student projects through the DISTI Duffer and sponsors such as Delta Capital Management.

Additionally, we are proud to announce the formation of a working relationship with WUCF so more STEM messaging can be seen throughout our entire community.

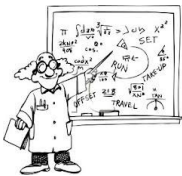

I urge you to continue the momentum. Reach out to family and friends and provide them with information. Ask the companies you work for about opportunities they have for student internships or apprenticeships. And, by all means, get to know and understand the needs of the dedicated educators in your school district and how you can provide resources to support their extraordinary efforts in the classroom.

This is my last message as Chair, as my term is up and I will transition back to the Board of Directors. Thank you all for your tremendous support and please join me in welcoming our new Chair, Carol Ann Dykes, from the UCF Business Incubator and new Vice Chair, Shawn Harris, from NBC/Universal. Their leadership and your support will continue to build a path for generations of students!

Thank you and KEEP STEMulating!

Bill Duerden, Chair, Central Florida STEM Education Council
